

An URGENT Security Warning For Businesses Running Windows 10

From: Paul Nebb
CEO, Titan Technologies
www.TimeForTitan.com
Microsoft Certified Partner
And Cyber Security Expert

If your organization is currently running Windows 10 on one or more computers in your office, you need to know about a **dangerous security threat to your organization that must be addressed within the next 3 months**. Please take a moment to read this important announcement.

Dear Colleague,

My name is Paul Nebb, CEO of Titan Technologies, and as a Microsoft Certified Partner, we are urgently reaching out to businesses in New Jersey using Windows 10 to alert you to a critical security risk to your organization and inform you about what you need to do to protect your company.

Microsoft has officially announced that it will **retire support for Windows 10 on October 14, 2025**. This means that any computer running Windows 10 will be completely exposed to serious hacker attacks designed to steal your data, crash your system and compromise your business in ways you do NOT want to deal with.

This is such a severe risk that organizations handling sensitive financial or medical information are required by law to upgrade from unsupported operating systems like Windows 10 because firewalls and anti-virus software alone will not be sufficient to protect them (or you).

If you don't want cybercriminals running rampant on your network, you **MUST** upgrade any systems running Windows 10. And while October 14, 2025, may seem distant, updating your IT infrastructure takes considerable time, so you need to act **NOW**.

Free Microsoft Risk Assessment And Migration Plan: Discover The Easiest, Most Budget-Friendly Way To Upgrade

As a local Microsoft Certified Partner, my company is committed to helping businesses in New Jersey by offering a free Microsoft Risk Assessment and Migration Plan.

At no cost, we'll come to your office and conduct our proprietary 72-Point Risk Assessment to determine which specific computers and servers will be affected by the Windows 10 end-of-life announcement. We will also assess other security, backup and efficiency factors that could cost you in productivity and dollars.

After conducting this assessment for hundreds of businesses like yours, I'm confident that we will not only expose potential security risks you weren't aware of but also uncover opportunities to make your business more efficient and productive. We'll also create a customized Migration Plan to help you painlessly upgrade from Windows 10 while:

- **Avoiding costly hardware and software expenses:** We have developed a solution allowing businesses like yours to upgrade affordably without a massive hit to cash flow.
- **Ensuring complete disaster recovery:** You'll never have to worry about data loss or excessive downtime due to system failure, human error, or other disasters.
- **Reducing IT support costs:** We can typically reduce IT expenses by 25% to 40% while giving your team the flexibility to work securely from anywhere with our cloud-based solutions.

At the very least, you'll gain a third-party security review of your network for free. To claim your Free Risk Assessment and Migration Plan, go to:
www.TimeForTitan.com/Windows-10-End-Of-Life

I also want to assure you that this consultation will not be a "high-pressure" sales meeting but rather an informative discussion designed to arm you with the facts and strategies you need. If you choose to work with us after, great! If not, that's fine too.

I will have Beth from my office call you next week to ensure you've seen this letter and to schedule your Free Risk Assessment. Please don't procrastinate—upgrading before the deadline ensures you avoid security risks and keeps your business compliant.

Best regards,

Paul Nebb, CEO

What Do Our Clients Have To Say About Titan Technologies

“At Bedford Tax Services, we rely on technology-driven applications like tax and practice management software. Titan Technologies keeps these systems running smoothly and provides expert support when issues arise. What truly sets them apart is how they manage vendor interactions for us—saving time and avoiding unnecessary headaches. They’re an essential partner for any CPA firm.”

Michael Zola, CPA
Bedford Tax Services

“Titan Technologies has been a key partner in modernizing our practice—upgrading servers, moving our systems to the cloud, and strengthening our cybersecurity. During our new office buildout, they handled everything from cabling to installation. More than just IT providers, they consistently find ways to boost our law firm’s efficiency. They’re true strategic partners.”

Frances Tomes, Esq.
Tomes Law Firm – Freehold, NJ

“Titan Technologies consistently goes above and beyond for our company. When network issues bring work to a halt, their team responds within minutes—and they don’t stop at quick fixes. They follow through with calls, site visits, and even equipment replacements when needed. I highly recommend them to any business needing reliable IT support.”

Ed Rogers
Royal Irrigation – Marlboro, NJ

“After 15 years at the same location, we purchased a building and moved our office. Rather than trying to patch together our IT needs alone, we call in the experts at Titan. They help us understand how to upgrade the systems and organize the infrastructure. Utilizing Titan makes our experiences worry free.”

Karen Thoms, Partner
Quality Title and Abstract Agency – Eatontown, NJ
